Lê Văn Khiêm DevOps Intern

levankhiem0000@gmail.com
0338882562
Hanoi, Vietnam
github.com/khimkhum

EDUCATION

Information Technology 2022 – 2027
Học viện Kỹ thuật Mật mã (KMA) Hanoi, Vietnam

SKILLS

Technical Skills
Operating Systems & Scripting: Linux, Bash, Python
Version Control: Git, GitHub
Containerization: Docker, Docker Compose
Orchestration: Kubernetes, k3d, Helm
Cloud & IaC: AWS, Terraform
CI/CD & GitOps: GitHub Actions, Argo CD
Registry & Databases: Harbor, PostgreSQL
Monitoring: Prometheus, Grafana

Soft Skills
Teamwork & Collaboration
Self-Learning & Adaptability
Communication
Time Management

PROJECTS

VProfile – Cloud Infrastructure & CI/CD
Technologies: AWS, Terraform, Docker, Kubernetes, Helm, GitHub Actions, Argo CD, Java, Maven
GitHub: https://github.com/khimkhum/vprofile-full
- Organized a Java/Maven application, Docker configurations, Terraform infrastructure, and Kubernetes deployment manifests in a single repository.
- Created Terraform infrastructure configurations for AWS resources.
- Configured GitHub Actions workflows to support automated application builds and code quality checks.
- Prepared Helm charts and Argo CD manifests for Kubernetes deployment and GitOps-based application delivery.

DevOps Demo App – Containerization & Kubernetes
Technologies: Python, Flask, Docker, Docker Compose, PostgreSQL, Harbor, Kubernetes, k3d
GitHub: https://github.com/khimkhum/devops-demo-app
- Containerized a Flask application using a multi-stage Dockerfile and non-root execution.
- Configured Docker Compose with PostgreSQL persistent storage and health/readiness checks.
- Deployed container images from a private Harbor registry using digest-based image references.
- Prepared Kubernetes manifests for a local k3d cluster, including Deployments, Services, Ingress, StatefulSet, and PersistentVolumeClaim.
- Implemented automated application tests and database failure/recovery checks.

CAREER OBJECTIVE:

Motivated Information Technology student at the Academy of Cryptography Techniques, seeking a DevOps Intern position. Familiar with Linux, Docker, Kubernetes, AWS, Terraform, CI/CD, and GitOps through hands-on projects. Eager to gain practical experience in cloud infrastructure, deployment automation, and system operations while contributing to a professional DevOps team.
